

HIGHLIGHT MSL-PHL Specifications

About Us,

MSL USA's LED streetlights are trusted by electrical contractors, government agencies, and project managers across the United States. Our selection of streetlights include fixtures with dusk to dawn photocell technology as well as weather resistant coating to ensure smooth operation through harsh weather conditions. We also offer solar powered streetlights for environmentally friendly projects. We advanced production technology, we deliver smart lighting solutions for streets, gardens, residential areas, and many more...

MSL-PHL is cutting-edge lighting solution is meticulously designed to withstand the test of time, minimizing maintenance and replacement costs while delivering consistent, high-quality illumination year after year. Built with premium-grade materials, this LED streetlight is engineered to handle a wide range of environmental conditions, from extreme heat to heavy rain and strong winds. Its weatherproof and corrosion-resistant design ensures unwavering performance even in the most challenging outdoor settings, making it ideal for streets, highways, parking lots, and public places.

Technical Specifications

Model	
Led power	10W-240W
Luminous flux	135lm/W~145lm/W
Voltage	AC 100~277V / AC 200~480 V
PF	0.95
Driver	Sosen / Inventronics
Color Rendering Index (CRI)	≥ 70
Fixture color	
Color temperature	4500~5500K (2500~5500K optional)
Distribution type	Type II / Type III
Body Material	Die-cast aluminum housing with integral mounting for strength and durability
IP/ IK Rating	IP66 / IK09
Motion Sensor	No Motion Sensor
Operating Temperature	-45°C to +45°C (-49°F to 113°F)
Warranty	5 Years

FEATURES

High quality Sosen driver + Lumileds 3030 LED chips
Beam angle of 70x140°, 70x150°, 90x145°
Multi-voltage choices are available in 100-277VAC and 277-480V AC
Easy Installation, Direct Slide-in Mount.
CE, RoHS, ETL and DLC approval IP66, water and dust proof.
10KV surge protection and 3G Vibration.
5 Years Warranty.

APPLICATIONS

IP66 rated waterproof, state-of-the-art, aesthetically pleasant compact design street lights with no exposed electronics or wiring are safe to use in any harsh extreme outdoor conditions, such as motorways, major roadways, crossings, parking lots, walkways and general large areas.

Roads & Motorways

Urban & Residential Streets

Bike & Pedestrian Paths

Squares & Pedestrian Areas

Bridges

Large Areas

Railway Station & Metros

Car Parks

LIGHT SPILL CONTROL

Any light that falls beyond the area that is being illuminated that is not intentional or required is considered spill light. Besides the special designed optics, kinds of different shields used to control the light distribution well. Limit light pollution and no light for dark sky.

Street Side Shields(Front)

NEMA/Zhaga Connection

INSTALLATION

1. Unlock the screws, adjust the angle of slip fitter.
2. Feed the power cord through the pole and make wiring.
3. Insert the fixtures into the pole, lock the screws.

ELECTRICS

Field Adjustable Output Module

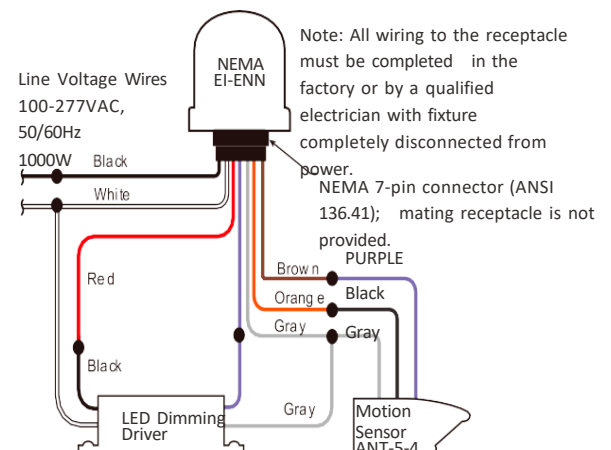

The Field Adjustable Output Module is a factory-installed voltage regulating device that is connected to the gray (-) and violet (+) 0-10V dimming leads of the LED driver.

Manually dialing the switch allows the fixture to be dimmed in the field.

Future Ready NEMA/Zhaga Connection

Ready NEMA or Zhaga socket to enable further control of streetlight from simple photocell to smart city controller node.

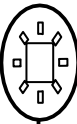

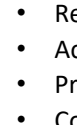

A FUTURE PROOF SOLUTION

Smart City

iNET™ Intelligent Lighting Monitor & Control System is a cloud based wireless smart system designated for lighting management. With gateways + control node., iNET™ System monitors lights performance status, collects operation data, controls lights on/off or dimming, and sends alarm in case of fault detected.

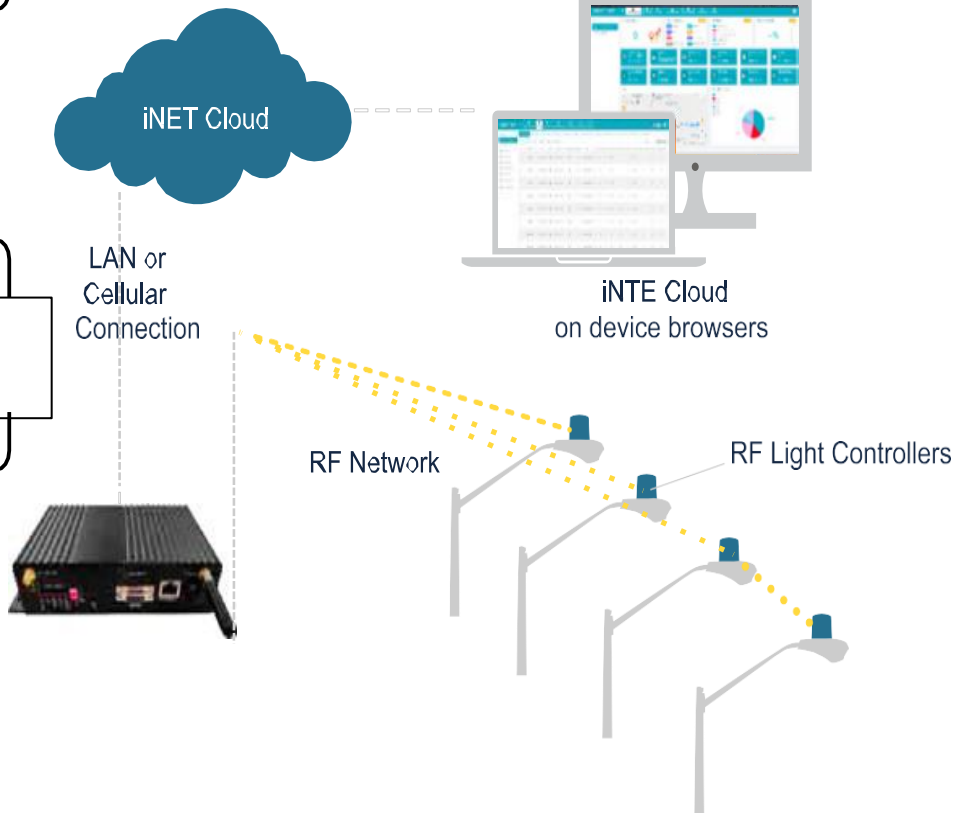

- 
- Automatic light ON/OFF & Dimming Control**
- By time settings
 - ON/OFF or dimming with motion sensor detection
 - ON/OFF or dimming photocell detection

- 
- Accurate Operation & Fault Monitor**
- Real-time monitor on each light working status
 - Accurate report on fault detected
 - Provide location on fault no patrol required
 - Collect each light operation data, such as voltage, current power consumption

- 
- Extra I/O Ports for Sensor Expandability**
- Environment Monitor
 - Traffic monitor
 - Security Surveillance
 - Seismic Activities Monitor

- 
- Reliable Mesh Network**
- Self-proprietary wireless control node
 - Reliable node to node, gateway to node communication
 - Up to 1000 nodes per network
 - Max. network diameter 2000 m

- 
- Easy to use Platform**
- Easy monitor on each and all lights status
 - Support lighting policy remote set-up
 - Cloud server accessible from computer or handheld device
